

# Product Revision Change Notice

Date: 1/23/2017  
Product Description: Synrad ti-Series High Performance CO<sub>2</sub> Laser  
Product P/N: All FSTi60, FSTi80, FSTi100  
Description of Change: ti-Series Optic Change  
RCN#: 2017-001

Series laser optics from the current copper based design to a silicon optic. We will initially build a limited number of 10.6µm lasers with the new optics in Q1/Q2 2017 for customer evaluation, with an expected change over to the new optics on all Ti-Series lasers by the end of 2017.

This change will NOT affect the form, fit or function of the laser, but will provide even longer optical lifetime and pulsing durability.

Lasers equipped with the new optics will be denoted by a new revision letter:

- FSTi60xxG will change to FSTi60xxH
- FSTi80xxC will change to FSTi80xxD
- FSTi100xxB will change to FSTi100xxC
